

Title of the Research

Evaluating Commercial Facial Analysis Algorithms

Principal Investigators

- [redacted]

Key Information About the Study

Your permission is being sought for your participation in research. Participation in the research is voluntary.

The purpose of this research is to evaluate the usability and efficacy of commercial facial analysis services. Participating in the study will take up to either 60 minutes or 90 minutes, depending on which session length you signed up for.

If you participate, we will take photos and videos of your face that we will use to evaluate commercial facial analysis algorithms. These algorithms commonly attempt to determine whether a photo or video is of a real person's face and approximate how old they are.

We may vary the lighting, ask you to pose in a particular posture, or provide you with materials to alter your appearance (e.g., glasses or a wig). These steps will enable us to test how commercial facial analysis algorithms respond to changes in a person's appearance. We will not provide feedback to you about how algorithms responded to these changes.

We will not ask you to sign up for or interact with any online service, and the only information about you that we may provide to a service is photos and videos of your face. We will take steps to ensure that this information is not used for any other purposes and is promptly deleted after the study. We will also promptly delete any photos or videos we collect after the study.

At the end of your participation, we will ask you to complete a brief survey about your demographics and use of online services.

We do not anticipate any risks or discomforts to you as a result of your participation.

This research aims to advance the science of facial analysis algorithms and inform the development of public policy related to facial analysis.

We are not aware of any alternative procedures for participation that may be advantageous to you.

Confidentiality

This study has been approved by the [redacted] IRB.

All records from this study will be kept confidential. Your responses will be kept private, and we will not include any information that will make it possible to identify you in any report we might publish.

The only identifiable information about you that we may disclose consists of photos and videos of your face. We will only disclose this information to commercial facial analysis services as necessary to conduct the research, and we will ensure that this information is not used for any other purposes and promptly deleted after the study. We will not disclose your name or other contact information to these services or to anyone else.

We will store our research records securely on password-protected computers. The research team will be the only party that will have access to our research records. We will not use or distribute your personal information for future research studies.

Compensation

If you participate in a 60-minute study session, you will receive a \$30 Amazon gift card. If you participate in a 90-minute study session, you will receive a \$45 Amazon gift card.

Who to Contact with Questions

You may contact the research team at: [redacted]

If you have questions regarding your rights as a research subject, or if problems arise which you do not feel you can discuss with the Investigator, please contact the Institutional Review Board at:

Phone: [redacted]

Email: [redacted]

Participating in the Study

If you choose to participate, before beginning the study, we will ask you to verbally confirm:

- You have read and understand the information in this consent form.
- Your participation in the study is voluntary.
- If you decline to participate, there will be no penalty or loss of benefits, other than the compensation associated with participating in the study.
- You may discontinue participation in the study at any time without penalty or loss of benefits. If you choose to discontinue, we will still compensate you for your participation.
- You do not waive any legal rights or release [redacted] or its agents from liability for negligence.
- You consent to participating in this research.

This study has been approved by the [redacted] IRB.

By signing below, I confirm that I have read and understand all the information provided in this form. I accept the terms outlined in this form and consent to participating in the study.

Participant name (print): _____

Participant signature: _____ Date: _____
