

Resources for Parents on Children's Online Safety

The goal of this study is to evaluate the effectiveness of commercial facial analysis algorithms. Online services use these algorithms for a range of purposes, including preventing fraud and ensuring only adults can access online content.

You may find the following resources helpful in explaining choices that are available to parents about the experiences that children can have online. This hyperlinked list is also available on our study website, [url].

- Guidance from Online Services
 - Apple's iOS Guidance
